EDUCATION

Echelon Institute of Technology (J.C. Bose U.S.T), Faridabad

2022 - 2026

B.Tech in Computer Science and Engineering

CGPA: 7.21 / 10

TECHNICAL SKILLS

Languages: Python, JavaScript, C++, SQL, HTML/CSS, SQL

Frameworks: Django, Node.js, Express, React, Next.js

Databases: PostgreSQL, MongoDB

Core CS Concepts: Data Structures & Algorithms, OOP, DBMS

Developer Tools: Git, GitHub, Postman, VS Code, Visual Studio

PROJECTS

LMS Application - Full stack Learning Management System

[Link](#)

Next.js, TypeScript, Tailwind, Shadcn, Clerk

- Engineered a scalable **Learning Management System (LMS)** enabling course creation, student enrollment, and content delivery.
- Architected **RESTful backend APIs** to support **CRUD operations** for courses, users, and enrollments.
- Integrated **payment gateway functionality using Razorpay (test mode)** for course purchase and enrollment workflows.
- Developed secure **authentication and authorization** mechanisms for **multi-user role management** using Clerk.
- Designed **normalized database schemas** to efficiently manage educational content and learner progress.

AI Tools – Brand Analysis

[Link](#)

JavaScript, LLM, Node.js, HTML, CSS, DOM

- Built an **AI-powered Tools Suite** that integrates multiple **Large Language Models (LLMs)** to generate intelligent content, **domain analysis**, and platform-specific message templates.
- Designed a backend using **Node.js and Express** to handle API routing, **prompt processing**, and **structured response** formatting from different AI models.
- Developed dynamic **prompt engineering** logic to generate **SEO insights**, **content suggestions**, **readiness analysis**, and platform-specific responses.
- Implemented **web scraping and data extraction** using **Axios and Cheerio** to feed real-time domain data into **LLM prompts** for contextual analysis.

Shopping Site

[Repo](#)

Django, Python, HTML, CSS, PostgreSQL

- Built a **full-stack** e-commerce platform with **Django**, enabling users to **browse products**, **add items to a cart**, and **place orders** with a straightforward checkout flow.
- Integrated **PostgreSQL to store users, products, orders, and cart data**, designing **relational models** that support product listings, inventory, and order history.
- Developed **dynamic cart management**: users can add, update, and remove items, with cart contents persisted across sessions.
- Created **order tracking** for users to view past purchases and order details, **improving the post-purchase experience**.
- Leveraged **Django's built-in admin to manage products** and orders efficiently, streamlining backend operations and testing.

CERTIFICATIONS

- Training and Internship Certification in Full Stack Web Development with Gen AI + DSA - **Coding Ninjas**
(Mode: Virtual — July 2025 - Apr 2026)
- Completion Certificate of **Web Development** Bootcamp — **Udemy**
(Instructor: Angela Yu — Mode: Virtual)
